**PRE-APPEAL BRIEF REQUEST FOR REVIEW**

Applicants respectfully request Review of the presently rejected claims due to clear error in the Examiner's rejections due to reliance on references that do meet the claim limitations. This request focuses on the rejections of the pending claims 1-5, and 7-19, which are all rejected only under § 103.

The claimed invention relates to a method of locating an idle mobile unit. The invention includes initiating a call to the mobile unit using a service node. The call is originated from the service node after it receives information regarding the phone number of the lost mobile, and (in some embodiments) receiving authorization that the requester is entitled to receive the tracking information. The call from the service node to the mobile is performed using existing messaging, including having the home MSC locate the mobile, which involves receiving a routing alias in the

form of a TLDN message from the serving MSC, and transmitting an ISUP message from the home MSC to the serving MSC. The serving MSC, then, recognizing the call to have originated from a service node, determines that the call is to generate location information.

The prior art cited by the Examiner does not disclose at least three separate elements of the independent claims 1 and 16. The arguments explaining the deficiencies in the prior art are set out on pages 6-8 of Applicants' "Response" filed on January 31, 2006. In short, the prior art fails to disclose (i) the use of a "facilities available" message containing location information, (ii) initiating a call from a Service Node; and (iii) identifying the call at the serving MSC as a request to locate the mobile.

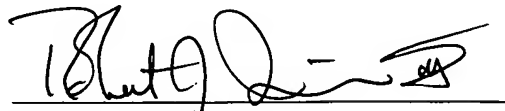

Because the references do not teach or suggest all of the claim limitations of Applicant's claims, Applicant respectfully submits that the pending claims are in condition for allowance. Accordingly, applicant respectfully requests favorable reconsideration and allowance of all of the claims.

Respectfully submitted,

McDonnell Boehnen Hulbert & Berghoff LLP
